

MOLD REMEDICATION

Residential, Commercial &
Industrial Buildings

MOLD should never be taken lightly. All of us seem to be more susceptible to allergies, asthma, irritants, coughs, flu, and sinus infections. And we need to know if we are working or living in a healthy environment. If you suspect you have mold in your workplace or home, let us do a few simple, cost-effective tests to analyze your indoor air quality.

CRAL Contracting Inc. has the knowledge, tools, and the training required to do a complete investigation and cleanup of all indoor air contamination and mold remediation for all building structures, homes, schools, hotels, hospitals, office buildings, retail facilities, etc.

We are fully certified, trained and bonded for all environmental remediation services.
